Studio1 Report

STUDIO1

Step1:

- Bingxin Liu

Step2:

Hostname: linuxlab006.engr.wustl.edu

Step3:

```
[bingxin.liu@linuxlab006 compile]$ ls -l bingxin.liu
total 0
```
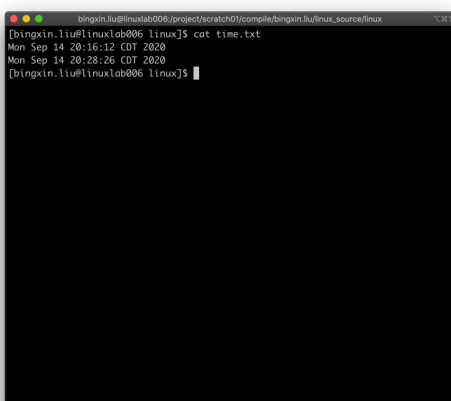

Step4:

```
// output:
[bingxin.liu@linuxlab006 linux]$ make kernelversion
5.4.42
```

Step5:

The option that I choose is named `CONFIG_SWAP`, which allows use to choose whether we hope to swap files in the kernel and then provide more presentable virtual memory.

Step6:

The compile time is shown within the screenshot.
